

After earning his B.S. in Materials Science and Engineering from Northwestern University in 2009, Andrew pursued a career in materials R&D, specializing in the development of high-performance specialty alloys and structural materials. He is a contributing inventor on 11 U.S. patents. After deciding that he wanted to focus full time on the patent process, he attended Washington University in St. Louis, where he earned his J.D. in 2020. Andrew focuses his practice on patent prosecution and litigation. His passion for metallurgy and materials science has never left him.

Andrew is currently admitted to practice in the State of Oregon.
